# Energy Saving Kit

Cuby G4, Sentry, Bee, Aria

- Automate A/C usage based on check-in/out*, occupancy, and presence.

- Reduce energy consumption without compromising comfort.

- Centralize the control of all A/C units from a single platform.

- Remotely monitor the status and consumption of each unit.

- Get metrics to optimize usage.

- Install wirelessly or with wiring, depending on the hotel's infrastructure.
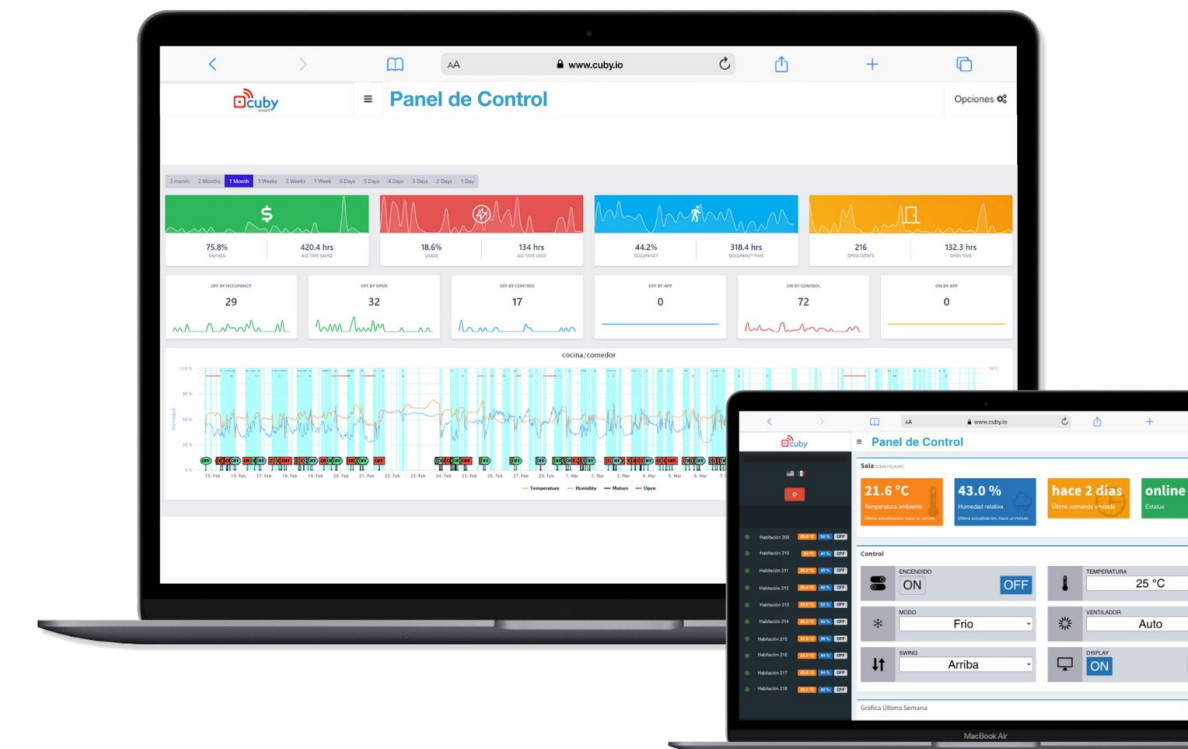

Via PMS integration, subject to implementation.

Energy Saving Kit

Cuby G4, Sentry, Bee, Aria

- Energy savings with temperature limits and shutdown triggered by open windows or balcony doors.

- Automate A/C usage based on check-in/out*, presence, and occupancy.

- Configurable automation logic:

  ○ Occupied with presence: free use.

  ○ Occupied without presence: dehumidifies and maintains a stable temperature.

  ○ Unoccupied with presence: dehumidifies and allows use with a 25 ºC temperature limit.

  ○ Unoccupied without presence: raises temperature and activates dehumidification.

- Integration with PMS for reservation-based automation.*

- Full control from a centralized platform.

- Wireless or wired installation, depending on the type of hotel.

*Via PMS integration, subject to implementation.
