# Cuby G4 + Sentry

- Keeps humidity levels low to protect the property.

- Allows the A/C to stay on for dehumidification, even when no guests are present.

- Prevents guests from setting excessively low temperatures, which increases energy consumption.

- Installs without construction or rewiring.

- Maintains guest comfort.

- Controls different models and brands of air conditioners.

Cuby G4 + Sentry

- Detect occupancy, temperature, and relative humidity to adjust the A/C.

- Automatically switch to dehumidification mode when no presence is detected, protecting against humidity.

- Control the A/C via infrared.

- Compatible with minisplits and infrared-based systems such as cassette, fan & coil, and more.

- Low implementation cost.

- Installed in minutes.

Wireless infrared signal

WiFi

Connected to power supply
